

EPISODE 17

Drawing with Rob

Ages 4-7:

ACTIVITY 1:

Let's draw our alien friends with Rob! Are your friends big or small? Short or tall? Are they one colour or many more? What are they called?

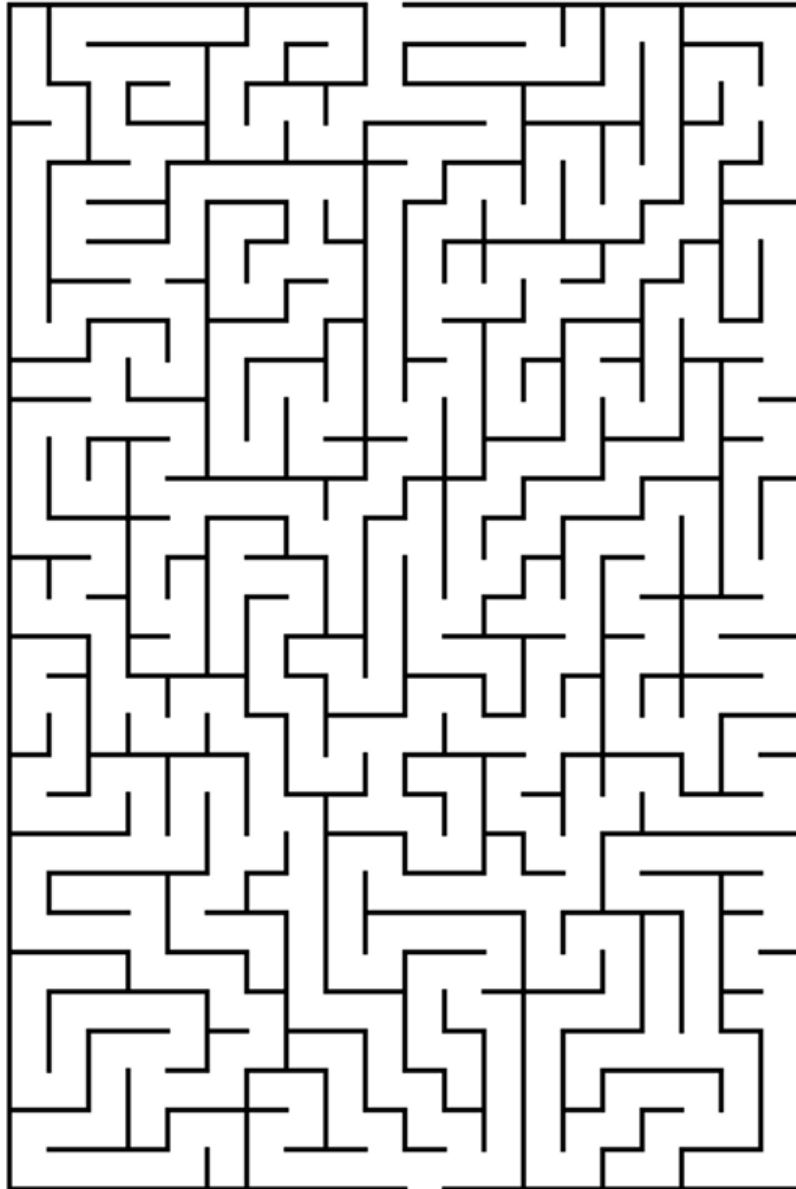

Tell us a little about them! We look forward to each of your alien friends!

ACTIVITY 2:

This little blue alien friend is trying to visit us after hearing about how much we love aliens! Help it find its way to the spaceship so it can come here quickly.

Ages 4-7:

Ages 8-13:

ACTIVITY 1:

Let's draw our own planet! What does your planet look like? What's the weather like there? Does it have the same seasons as Earth? Can humans live there? What about aliens? What do plants look like on this planet?

Draw your own planet and tell us about it and its special quirks!

ACTIVITY 2:

Humans must use spaceships and space stations to travel and live in space. The ISS is equipped with many advanced features for research and entertainment. What would your ship have? What would your bed look like? What will you put in it for entertainment?

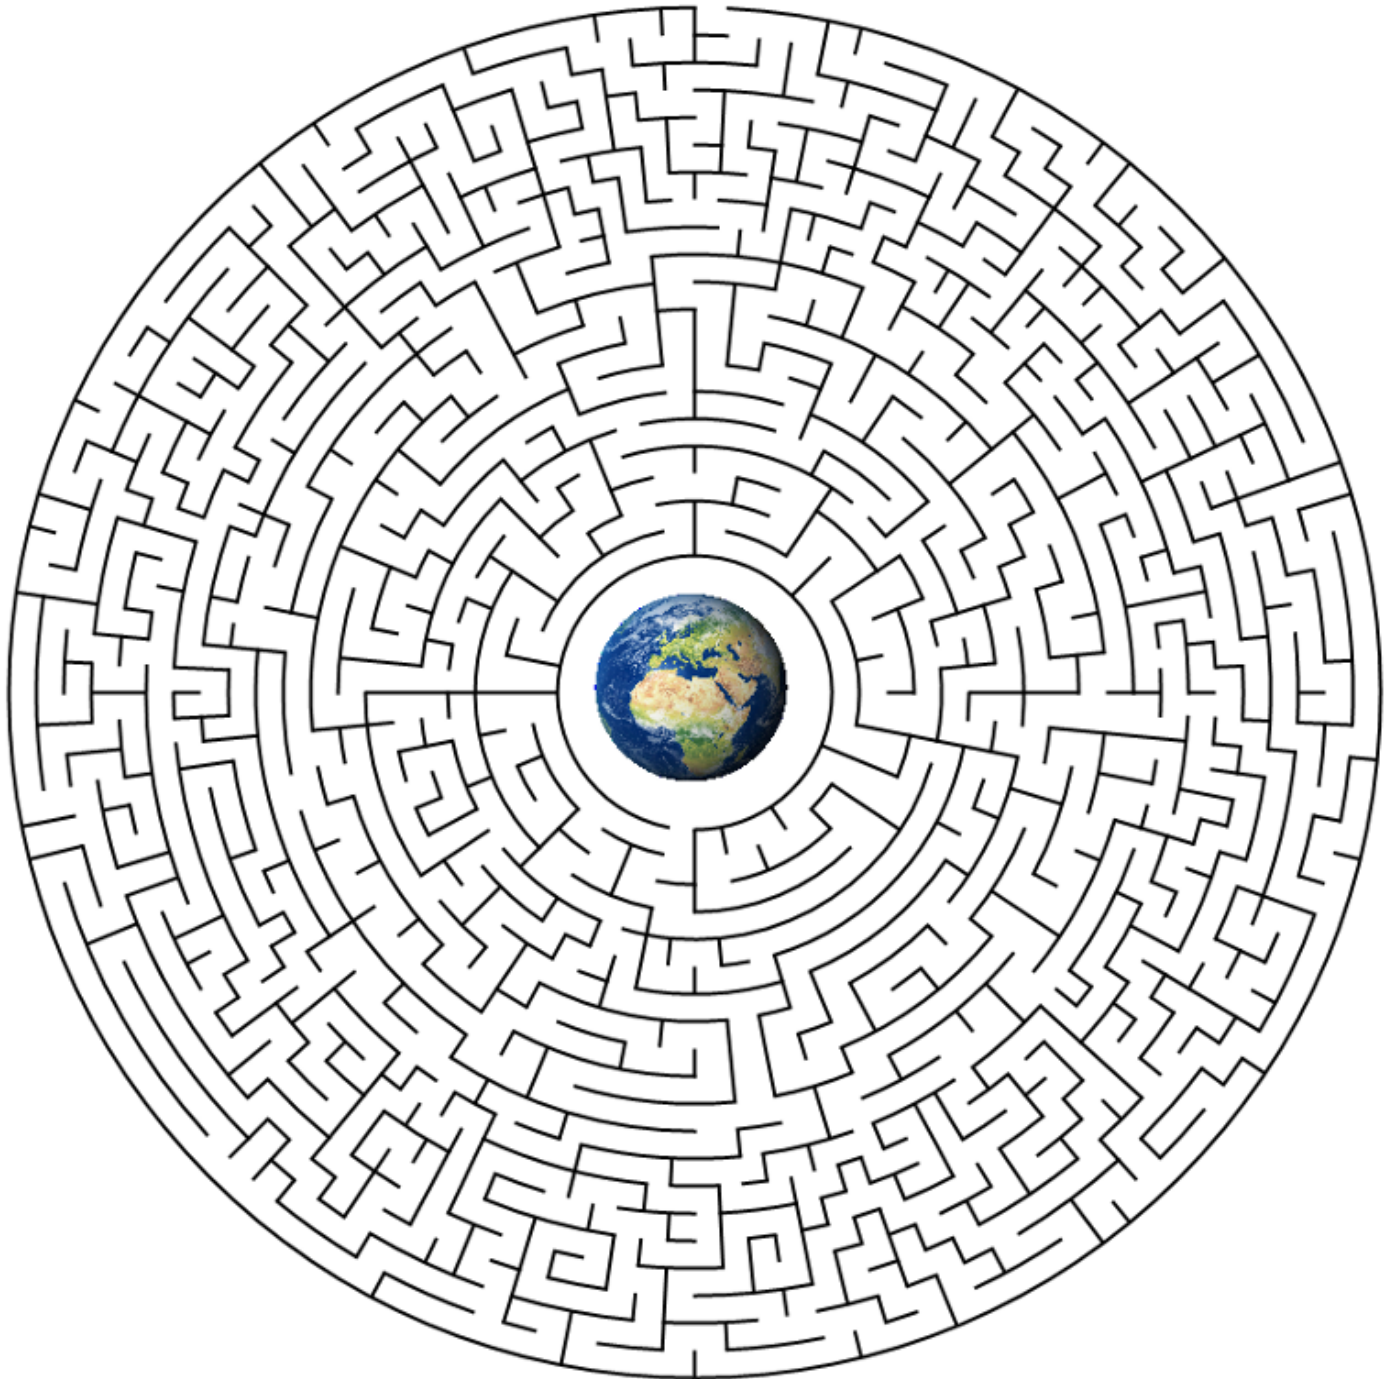

Draw your ship and show us what it looks like from the inside and from the outside. We can't wait to hear and see what your spaceships would look like!

ACTIVITY 3:

Our alien friend has almost reached Earth, help it navigate through space so it can land safely and learn about our planet.

Ages 8-13:

Ages 14+:

ACTIVITY 1:

Let's imagine what life is like on other planets. The way life develops is heavily influenced by the environment. What would alien life be like on a hot planet? What about a colder one? If the planet has stronger gravity, what would aliens look like there?

Draw an alien of your choice and tell us about why it looks like it does. Tell us about its features and the planet it comes from!

Bonus: Could a human astronaut survive this planet? What would they need to get on that planet and explore?

ACTIVITY 2:

Our friend has made it to earth, but accidentally landed in the wrong place! Help it find its way to the UAE so it can join us for this week's ELF in Space episode and activity.

Ages 14+:
